

BPI Course Overview

OVERVIEW

The BridgeWave Product Introduction (BPI) course is the first module in the online certification program. The course provides an overview of BridgeWave's products, feature sets, application and market examples, as well as an introduction to support and service offerings.

OBJECTIVES

At the end of this course students will understand product models numbers, what product features are available and a basic understanding of how the futures work. Students will also understand what markets and are a good fit for BridgeWave products and how the solutions compare or complement other solutions in the a market place.

INTENDED AUDIENCE

This course is designed for persons interested in purchasing, selling, or installing and designing BridgeWave solutions.

ESTIMATED TIME REQUIRED

This is a self-paced course that consists of a 60 min video presentation followed by a brief certification test. Total time for completion is estimated to be around 2 hours.

PREREQUISITES

None.
